# apollon

Quick Fitting Guide

1 Insert AA batteries in your hearing aid. Connect 4-pin programming cable to HI-PRO interface and to programming socket of apollon which is located under the shirt clip. Switch on the device.
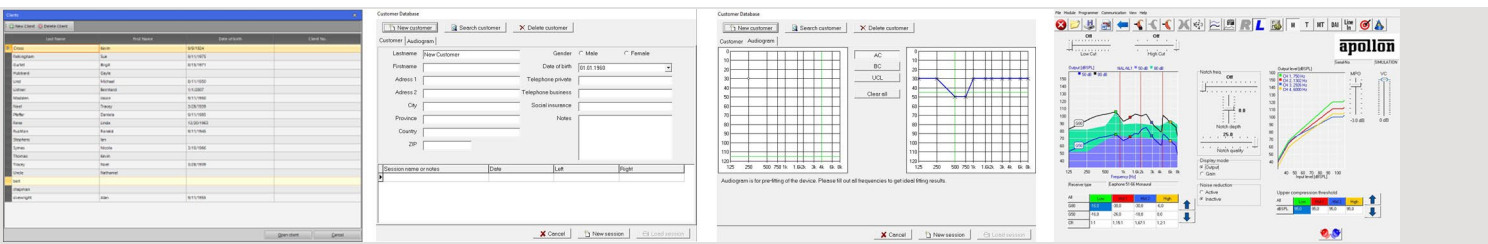

4-pin programming socket

2 Start program. (BHMFit2)

3 Select receiver type and side of fitting.

4 Open customer or create „New Costumer" and enter audiogram. Open session or create "New session".

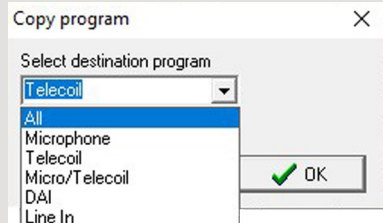

5 Press „First-Fit". (Button)

6 Adjust gain - you can select each field, column and row.

All	Low	Mid 1	Mid 2	High
G80	-16,0	-30,0	-30,0	-6,0
G50	-16,0	-26,0	-18,0	0,0
CR	1:1	1,15:1	1,67:1	1,2:1

7 Adjust MPO. (activated MPO avoids uncomfortable loud noise)

8 Copy program and transmit settings to all modes.

9 Store setting in the aid and save session when setting is perfect.

10 Exit program by „File - Quit" or press „Quit". (Button) Disconnect programming cable and mount shirt clip carefully.
